

KOCH AGRONOMIC SERVICES, LLC

SOLUBLE FERTILIZATION WITH

UMAXX® STABILIZED NITROGEN

UMAXX® stabilized nitrogen adapts easily to fit liquid feeding programs. From its dry form, the product can be dissolved and added as a soluble nitrogen source for spray applications.

This premium stabilized nitrogen fertilizer controls nitrogen loss due to ammonia volatilization, and reduces the potential for denitrification and leaching. Its long-lasting performance provides consistent green color desired by golf course superintendents and landscape professionals.

TIPS FOR DISSOLVING

- The warmer the water, the faster the product dissolves
- Pour the proper amount into the strainer on top of the tank
- Add water to the strainer of UMAXX® stabilized nitrogen

UMAXX® STABILIZED NITROGEN

- Quick green-up with sustained color
- Consistent performance across varying soil conditions (e.g. pH, temperature, moisture)
- Tank-mix compatible
- Exceptional turf color and quality
- Improved nitrogen efficiency by controlling loss due to ammonia volatilization and reducing the potential for denitrification and leaching
- Less nitrogen loss for more environmental responsibility

SOLUBLE FERTILIZATION INSTRUCTIONS AND SPECIFICATIONS

Gallons Per 1000 ft. ²	Coverage Per 100 Gallons (ft. ²)	Pounds of actual nitrogen per 1000 ft. ²				
		0.25	0.20	0.15	0.125	0.10
1.00	100	54	43	32	27	21
1.50	66.6	36	28	21	18	14
2.00	50	27	21	16	13	11

When using any soluble fertilizer product, there may be risk of insoluble contaminants that can clog nozzles and reduce the accuracy of spray applications. It is highly recommended that all primary and in-line filters and strainers be used to minimize this risk. To ensure accurate spray rates, add desired amount of UMAXX® stabilized nitrogen and other tank mix partners to spray solution prior to reaching 100 gallons of final tank mix.

PRODUCT SPECIFICATIONS

Product	UMAXX® stabilized nitrogen
Analysis	46-0-0
Grade	Regular
Uses	As an ingredient in dry or liquid fertilizer blends. Can be applied directly or dissolved for spray application.
Classification	Stabilized Nitrogen
