With 50% XCU[®] & Armament

Professional turf fertilizer

Regular grade (SGN 200)

Product Features

- 50% of the nitrogen is derived from XCU[®] polymer-coated, sulphur-coated urea. XCU[®] slow-release nitrogen provides extended feeding.

Turf Benefits

- XCU[®] slow-release fertilizer uses breakthrough technology to provide a unique coating that allows gradual and consistent nutrient release delivering up to 8 weeks of continuous feeding.
- Armament is a patented, biodegradable enhancer that insures turf nutrients remain in a plant-available form and unlocks tied-up trace elements already in the soil. It increases nutrient uptake by 20-30% at lower use rates with a longer release.
